CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

I.—The Oxidation of Polyhydric Alcohols in Presence of Iron. By HENRY J. HORSTMAN FENTON, M.A., and HENRY JACKSON, B.A., B.Sc. 1

II.—β-Aldehydopropionic Acid, $CHO\cdot CH_2\cdot CH_2\cdot COOH$, and β-Aldehydoisobutyric Acid, $CHO\cdot CH_2\cdot CH(CH_3)\cdot COOH$. By WILLIAM H. PERKIN, jun., and CHARLES H. G. SPRANKLING 11

III.—Cannabinol. Part I. By THOMAS BARLOW WOOD, M.A.; W. T. NEWTON SPIVEY, M.A.; THOMAS HILL EASTERFIELD, M.A., Ph.D. 20

IV.—Characterisation of Racemic Compounds. By FREDERIC STANLEY KIPPING and WILLIAM JACKSON POPE . . . 36

V.—Crystalline Form of Iodoform. By WILLIAM JACKSON POPE 46

VI.—$\beta\beta$-Dimethylglutaric Acid and its Derivatives; Synthesis of *cis*- and *trans*-Caronic Acids. By WILLIAM H. PERKIN, jun., and JOCELYN F. THORPE. 48

VII.—Synthesis of $\alpha\beta\beta$-Trimethylglutaric Acid, $COOH\cdot CH(CH_3)\cdot C(CH_3)_2\cdot CH_2\cdot COOH$. By WILLIAM H. PERKIN, jun., and JOCELYN F. THORPE . 61

VIII.—Occurrence of Orthohydroxyacetophenone in the Volatile Oil of *Chione glabra*. By WYNDHAM R. DUNSTAN, F.R.S., and THOMAS ANDERSON HENRY, Salters' Research Fellow in the Laboratories of the Imperial Institute . . . 66

IX.—Occurrence of Hyoscyamine in the *Hyoscyamus muticus* of India. By WYNDHAM R. DUNSTAN, F.R.S., and HAROLD BROWN, Assistant Chemist in the Laboratories of the Imperial Institute 72

X.—Preparation of Hyponitrite from Nitrite, through Hydroxyamidosulphonate. By EDWARD DIVERS, M.D., D.Sc., F.R.S., and TAMEMASA HAGA, D.Sc., F.C.S. 77

XI.—Absorption of Nitric Oxide in Gas Analysis. By EDWARD DIVERS, M.D., D.Sc., F.R.S. 82

XII.—Interaction of Nitric Oxide with Silver Nitrate. By EDWARD DIVERS, M.D., D.Sc., F.R.S. 83

PAGE

XIII.—Preparation of Pure Alkali Nitrites. By EDWARD DIVERS, M.D., D.Sc., F.R.S. 85

XIV.—Reduction of an Alkali Nitrite by an Alkali Metal. By EDWARD DIVERS, M.D., D.Sc., F.R.S. 87

XV.—Hyponitrites; their Properties, and their Preparation by Sodium or Potassium. By EDWARD DIVERS, M.D., D.Sc., F.R.S. 95

XVI.—Derivatives of Camphoric Acid. Part III. By FREDERIC STANLEY KIPPING, Ph.D., D.Sc., F.R.S. 125

XVII.—α-Ketotetrahydronaphthalene. By FREDERIC STANLEY KIPPING, Ph.D., D.Sc., F.R.S., and ALFRED HILL . . 144

XVIII.—Production of Optically Active Mono- and Di-alkyloxysuccinic Acids from Malic and Tartaric Acids. By THOMAS PURDIE, F.R.S., and WILLIAM PITKEATHLY, B.Sc., Berry Scholar in Science 153

XIX.—Determination of the Constitution of Fatty Acids. Part I. By ARTHUR WILLIAM CROSSLEY and HENRY RONDEL LE SUEUR 161

XX.—Some Halogen Derivatives of Acetone Dicarboxylic Acid. Part I. By FREDERICK W. DOOTSON, M.A. . . 169

XXI.—Action of Chlorosulphonic Acid on the Paraffins and other Hydrocarbons as a means of Purifying the Normal Paraffins. By SYDNEY YOUNG, D.Sc., F.R.S. . . . 172

XXII.—Oxidation of Sulphocamphylic Acid. By W. H. PERKIN, jun. 175

XXIII.—Researches on Moorland Waters. I. Acidity. By WILLIAM ACKROYD, F.I.C. 196

XXIV.—The Nutrition of Yeast. Part I. By ARTHUR L. STERN, D.Sc. 201

XXV.—An Isomeride of Amarine. By H. LLOYD SNAPE, D.Sc., Ph.D., and ARTHUR BROOKE, Ph.D. 208

XXVI.—Studies of the Terpenes and Allied Compounds. Nitrocamphor and its Derivatives. IV. Nitrocamphor as an Example of Dynamic Isomerism. By T. MARTIN LOWRY, B.Sc. 211

XXVII.—The Action of Ammonia on Ethereal Salts of Organic Acids. By SIEGFRIED RUHEMANN. 245

XXVIII.—The Changes of Volume due to Dilution of Aqueous Solutions. By EDWARD BRUCE HERSCHEL WADE, M.A. . 254

XXIX.—Methanetrisulphonic Acid. By ERNEST HAROLD BAGNALL, B.Sc. 278

XXX.—Maltodextrin: its Oxidation-Products and Constitution. By HORACE T. BROWN, LL.D., F.R.S., and JAMES HILLS MILLAR 286

PAGE

XXXI.—Attempts to Prepare Pure Starch Derivatives through their Nitrates. By HORACE T. BROWN, LL.D., F.R.S., and JAMES HILLS MILLAR 308

XXXII.—The Stable Dextrin of Starch Transformations, and its Relation to the Maltodextrins and Soluble Starch. By HORACE T. BROWN, LL.D., F.R.S., and JAMES HILLS MILLAR 315

XXXIII.—Position Isomerism and Optical Activity; the Methylic and Ethylic Salts of Benzoyl- and of Ortho-, Meta-, and Para-toluylmalic Acids. By PERCY FRANKLAND, Ph.D., F.R.S., and FREDERICK MALCOLM WHARTON, A.I.C., late Priestley Scholar in Mason University College, Birmingham. 337

XXXIV.—Some Regularities in the Rotatory Power of Homologous Series of Optically Active Compounds. By PERCY FRANKLAND, Ph.D., F.R.S. 347

XXXV.—Detection and Determination of Sucrose in the Presence of Lactose. By EDWIN DOWZARD . . . 371

XXXVI.—Note on Certain Isomeric Tertiary Benzylthioureas. By AUGUSTUS EDWARD DIXON, M.D. 373

XXXVII.—On Lössner's Benzoylethyloxysulphocarbamic Acid; and the Formation of Pseudoureas. By AUGUSTUS EDWARD DIXON, M.D. 375

XXXVIII.—Action of Metallic Thiocyanates on Certain Substituted Carbamic and Oxamic Chlorides; and a New Method for the Production of Thiobiurets. By AUGUSTUS E. DIXON, M.D. 388

XXXIX.—Formation of α-Pyrone Compounds and their Transformation into Pyridine Derivatives. By SIEGFRIED RUHEMANN 411

XL.—Hydrolysis of the γ-Cyanides of Di-substituted Acetoacetates. By WILLIAM TREVOR LAWRENCE . . . 417

XLI.—Bromomethylfurfuraldehyde. By HENRY J. HORSTMAN FENTON, M.A., and Miss MILDRED GOSTLING, B.Sc., Bathurst Student of Newnham College 423

XLII.—A Reaction of some Phenolic Colouring Matters. By ARTHUR GEORGE PERKIN, F.R.S.E. 433

XLIII.—A Method of Studying Polymorphism, and on Polymorphism as the Cause of some Thermal Peculiarities of Chloral Hydrate. By WILLIAM JACKSON POPE . 455

XLIV.—Contribution to the Characterisation of Racemic Compounds. By A. LADENBURG 465

XLV.—Etherification Constants of Substituted Acetic Acids. By JOHN J. SUDBOROUGH and LORENZO L. LLOYD . . 467

PAGE

XLVI.—The Rotatory Powers of Optically Active Methoxy- and Ethoxy-propionic Acids prepared from Active Lactic Acid. By THOMAS PURDIE, F.R.S., and JAMES C. IRVINE, B.Sc. 483

XLVII.—Position-Isomerism and Optical Activity. The Comparative Rotatory Powers of Methylic and Ethylic Ditoluylglycerates. By PERCY FRANKLAND, F.R.S., and HENRY ASTON, late Priestley and Forster Scholar in Mason University College, Birmingham 493

XLVIII.—Isomeric Fencholenic Acids. By GEORGE BERTRAM COCKBURN, B.A., B.Sc. 501

XLIX.—Synthesis of some Derivatives of $\beta\beta'$-Dipyridyl from Citrazinic Acid. By W. J. SELL, M.A., F.I.C., and H. JACKSON, B.A., B.Sc. 507

L.—The Condensation of Oxalic Acid and Resorcinol. By JOHN THEODORE HEWITT and ARTHUR ERNEST PITT . . . 518

LI.—Synthesis and Preparation of Terebic and Terpenylic Acids. By W. TREVOR LAWRENCE 527

LII.—Ethyl Ammoniumsulphite. By EDWARD DIVERS and MASATAKA OGAWA 533

LIII.—Ethyl Ammonium Selenite and the Non-existence of Amidoselenites (Selenosamates). By EDWARD DIVERS and SEIHACHI HADA. 537

LIV.—The Action of Certain Acidic Oxides on Salts of Hydroxy-acids. IV. By GEORGE GERALD HENDERSON, D.Sc., M.A., THOMAS WORKMAN ORR, and ROBERT J. GIBSON WHITEHEAD 542

LV.—Derivatives of $\alpha\alpha'$-Dibromocamphorsulphonic Acid. By ARTHUR LAPWORTH 558

LVI.—Crystalline Glycollic Aldehyde. By HENRY J. HORSTMAN FENTON, M.A., and HENRY JACKSON, B.A., B.Sc. . . . 575

LVII.—Diortho-substituted Benzoic Acids. Part IV. Formation of Salts from Diortho-substituted Benzoic Acids and different Organic Bases. By LORENZO L. LLOYD and JOHN J. SUDBOROUGH 580

LVIII.—A New Compound of Arsenic and Tellurium. By E. C. SZARVASY, Ph.D., and C. MESSINGER, Ph.D. 597

LIX.—The Combustion of Carbon Disulphide. By HAROLD BAILY DIXON and EDWARD JOHN RUSSELL 600

LX.—The Action of Nitric Oxide on Nitrogen Peroxide. By HAROLD BAILY DIXON and JAMES DYSART PETERKIN . . 613

LXI.—On the Mode of Burning of Carbon. By HAROLD BAILY DIXON 630

PAGE

LXII.—A Study of the Absorption Spectra of Isatin, Carbostyril, and their Alkyl Derivatives in Relation to Tautomerism. By Walter Noel Hartley, F.R.S., and James J. Dobbie, M.A., D.Sc. 640

LXIII.—Preparation of Acid Phenylic Salts of Dibasic Acids. By Samuel Barnett Schryver, D.Sc., Ph.D. 661

LXIV.—Corydaline. Part VI. By James J. Dobbie, D.Sc., M.A., and Alexander Lauder 670

LXV.—The Relative Efficiency and Usefulness of various Forms of Still-head for Fractional Distillation, with a Description of some new Forms possessing special Advantages. By Sydney Young, D.Sc., F.R.S. 679

LXVI.—The Salts of Dimethylpyrone, and the Quadrivalence of Oxygen. By J. N. Collie, Ph.D., F.R.S., and Thomas Tickle, Salters' Company's Research Fellow in the Research Laboratory of the Pharmaceutical Society of Great Britain 710

LXVII.—Chemical Examination of the Oleo-resin of *Dacryodes hexandra*. By Andrew More, A.R.C.S. 718

LXVIII.—Estimation of Boric Acid mainly by Physical Processes. By A. Wynter Blyth 722

LXIX.—The Blue Salt of Fehling's Solution and other Cuprotartrates. By Orme Masson, M.A., D.Sc., and B. D. Steele, B.Sc. 725

LXX.—The Allotropic Modifications of Phosphorus. By David Leonard Chapman, B.A. 734

LXXI.—Oxidation of Furfuraldehyde by Hydrogen Peroxide. By C. F. Cross, E. J. Bevan, and Thv. Heiberg . . 747

LXXII.—Active and Inactive Phenylalkyloxyacetic Acids. By Alex. McKenzie, M.A., D.Sc. 753

LXXIII.—Some Derivatives of Dimethyldihydroresorcinol. By Arthur William Crossley 771

LXXIV.—Condensation of Ethylic Salts of Acids of the Acetylene Series with Ketonic Compounds. By Siegfried Ruhemann and A. V. Cunnington 778

LXXV.—Action of Hydrogen Peroxide on Carbohydrates in the Presence of Ferrous Salts. By Robert Selby Morrell, M.A., Ph.D., and James Murray Crofts, B.A., B.Sc. . 786

LXXVI.—The Action of Alkyl Haloids on Hydroxylamine. Formation of Substituted Hydroxylamines and Oxamines. By Wyndham R. Dunstan, F.R.S., and Ernest Goulding, B.Sc. 792

LXXVII.—The Condensation of Ethylic Acetonedicarboxylate and Constitution of Triethylic Orcinoltricarboxylate. By David Smiles Jerdan 808

PAGE

LXXVIII.—The Colouring Matter of Cotton Flowers, *Gossypium herbaceum*. Note on Rottlerin. By ARTHUR GEORGE PERKIN, F.R.S.E. 825

LXXIX.—The Colouring Matters contained in Dyer's Broom (*Genista tinctoria*) and Heather (*Calluna vulgaris*). By ARTHUR GEORGE PERKIN, F.R.S.E., and FREDERICK GEORGE NEWBURY 830

LXXX.—Researches on the Alkyl-substituted Succinic Acids. Part I. Methods of Preparation. By WILLIAM A. BONE and CHARLES H. G. SPRANKLING. 839

LXXXI.—Some Derivatives of Dibenzyl Ketone. By FRANCIS E. FRANCIS, B.Sc., Ph.D., Lecturer in Chemistry, University College, Bristol 865

LXXXII.—Action of Light and of Oxygen on Dibenzyl Ketone. By EMILY C. FORTEY, B.Sc. 871

LXXXIII.—The Vapour Pressures, Specific Volumes and Critical Constants of Hexamethylene. By SYDNEY YOUNG, D.Sc., F.R.S., and EMILY C. FORTEY, B.Sc. 873

LXXXIV.—The Composition and Tensions of Dissociation of the Ammoniacal Chlorides of Cadmium. By WILLIAM ROBERT LANG, D.Sc., and ALBERT RIGAUT 883

LXXXV.—The Aluminium–Mercury Couple. Part I. Action of Sulphur Chloride on some Hydrocarbons in presence of the Couple. By JULIUS BEREND COHEN and FREDERICK WILLIAM SKIRROW, The Yorkshire College 887

LXXXVI.—The Aluminium–Mercury Couple. Part II. The Action of Bromine on Organic Compounds in presence of the Couple. By JULIUS BEREND COHEN and HENRY D. DAKIN, The Yorkshire College 893

LXXXVII.—Experiments on the Constitution of Isocamphoronic Acid. By WILLIAM HENRY PERKIN, jun., and JOCELYN FIELD THORPE 897

LXXXVIII.—The *cis*- and *trans*-β-Phenylbutane-$\alpha\alpha_1\alpha_2$-tricarboxylic Acids,

$$COOH\cdot CH_2\cdot CH(C_6H_5)\cdot CH(COOH)\cdot CH_2\cdot COOH.$$

By JOCELYN FIELD THORPE and WILLIAM UDALL . . 904

LXXXIX.—Experiments on the Synthesis of Camphoric Acid. Part II. By H. A. AUDEN, WILLIAM HENRY PERKIN, jun., and J. L. ROSE 909

XC.—The Action of Ethylene Dibromide and Trimethylene Dibromide on the Sodium Compound of Ethylic Cyanacetate. By H. C. H. CARPENTER and WILLIAM HENRY PERKIN, jun. 921

XCI.—Influence of Substitution on Specific Rotation in the Bornylamine Series. By MARTIN ONSLOW FORSTER, Ph.D., D.Sc. 953

PAGE

XCII.—Studies of the Acids of the Acetylene Series. By Siegfried Ruhemann and Alfred V. Cunnington. . . 954

XCIII.—A Contribution to the Chemistry of the Mandelic Acids. By Alex. McKenzie, M.A., D.Sc. 964

XCIV.—Non-existence of the so-called Suboxide of Phosphorus. By David Leonard Chapman and F. Austin Lidbury. . 973

XCV.—The Chlorine Derivatives of Pyridine. Part III. The Interaction of Chlorine and Pyridine Hydrochloride. By William James Sell, M.A., F.I.C., and Frederick William Dootson, M. A. 979

XCVI.—Homocamphoronic and Camphononic Acids. By Arthur Lapworth D.Sc., and Edgar M. Chapman, Burrough's Scholar in the Research Laboratory of the Pharmaceutical Society of Great Britain. 986

XCVII.—The Action of Hydrogen Peroxide on Secondary and Tertiary Aliphatic Amines. Formation of Alkylated Hydroxylamines and Oxamines. By Wyndham R. Dunstan, F.R.S., and Ernest Goulding, B.Sc. 1004

XCVIII.—Amidoamidines of the Naphthalene Series. By Raphael Meldola, F.R.S., and Percy Phillip Phillips. . 1011

XCIX.—Condensations of Anhydracetonebenzil and its Analogues with Aldehydes. By Francis R. Japp, F.R.S., and Alexander Findlay, M.A., B.Sc. 1017

C.—Triphenyloxazolone. By Francis R. Japp, F.R.S., and Alexander Findlay, M.A., B.Sc. 1027

CI.—Interaction of Phenanthraquinone, Acetophenone, and Ammonia. By Francis R. Japp, F.R.S., and Andrew N. Meldrum, B.Sc. 1032

CII.—Furfuran Derivatives from Benzoin and Phenols. By Francis R. Japp, F.R.S., and Andrew N. Meldrum, B.Sc. 1035

CIII.—Interaction of Benzoin with Phenylenediamines. By Francis R. Japp, F.R.S., and Andrew N. Meldrum, B.Sc. 1043

CIV.—A Series of Substituted Nitrogen Chlorides and their Relation to the Substitution of Halogen in Anilides and Anilines. By F. D. Chattaway and K. J. P. Orton . . 1046

CV.—Synthetical Preparation of Glucosides. By Hugh Ryan, M.A., 1851 Exhibition Scholar of the Queen's College, Galway 1054

CVI.—The Action of Sulphuric Acid on Fenchone. By James E. Marsh 1058

CVII.—On a Method for Providing a Current of Gaseous Chloroform mixed with Air in any desired proportion, and on Methods for Estimating the Gaseous Chloroform in the Mixtures. By A. Vernon Harcourt, M.A., F.R.S., Lee's Reader in Chemistry at Christ Church, Oxford . . 1060

PAGE

CVIII.—The Application of Powerful Optically Active Acids to the Resolution of Externally Compensated Basic Substances. Resolution of Tetrahydroquinaldine. By WILLIAM JACKSON POPE and STANLEY JOHN PEACHEY 1066

CIX.—The Application of Powerful Optically Active Acids to the Resolution of Externally Compensated Basic Substances. Resolution of Tetrahydroparatoluquinaldine. By WILLIAM JACKSON POPE and EDMUND MILTON RICH 1093

CX.—The Application of Powerful Optically Active Acids to the Resolution of Externally Compensated Basic Substances. Resolution of Racemic Camphoroxime. By WILLIAM JACKSON POPE 1105

CXI.—Homogeneity of Dextrolævo-α-phenethylamine Dextrocamphorsulphonate. By WILLIAM JACKSON POPE and ALFRED WILLIAM HARVEY. 1110

CXII.—A Method for Discriminating between "Non-racemic" and "Racemic" Liquids. By WILLIAM JACKSON POPE and STANLEY JOHN PEACHEY 1111

CXIII.—The Characterisation of "Racemic" Liquids. By FREDERIC STANLEY KIPPING and WILLIAM JACKSON POPE . 1119

CXIV.—Asymmetric Optically Active Nitrogen Compounds. Dextro- and Lævo-α-benzylphenylallylmethylammonium Iodides and Bromides. By WILLIAM JACKSON POPE and STANLEY JOHN PEACHEY 1127

CXV.—Tetrazoline. By SIEGFRIED RUHEMANN and H. E. STAPLETON, Scholar of St. John's College, Oxford . . 1131

CXVI.—Action of Hydrolytic Agents on α-Dibromocamphor. Constitution of Bromocamphorenic Acid. By ARTHUR LAPWORTH 1134

CXVII.—Camphoroxime. Part III. Behaviour of Camphoroxime towards Potassium Hypobromite. By MARTIN ONSLOW FORSTER, Ph.D., D.Sc. 1141

CXVIII.—Influence of an Unsaturated Linking on the Optical Activity of Certain Derivatives of Bornylamine. By MARTIN ONSLOW FORSTER, Ph.D., D.Sc. 1149

CXIX.—The Interaction of Sodium Hydroxide and Benzaldehyde. By CHARLES ALEXANDER KOHN, Ph.D., B.Sc., and WILLIAM TRANTOM, Ph.D., B.Sc. 1155

CXX.—The Ultra-violet Absorption Spectrum of Proteids in Relation to Tyrosine. By A. WYNTER BLYTH . . . 1162

Annual General Meeting 1167
